

RAPID7 NEXPOSE ENTERPRISE

KEY BENEFITS

- **Gain accurate visibility of actual risk** with continuous discovery of all physical and virtual assets.
- **Get enterprise-class protection** with up-to-date scans for over 28,000 vulnerabilities and 85,000 checks across your physical and virtual networks, operating systems, databases and Web applications.
- **Automate all steps in your vulnerability management lifecycle** from discovery to prioritization and issue resolution.
- **Eliminate the most significant malware threats to your organization** with Malware Exposure information tied directly to vulnerability scan data.
- **Improve strategic decision making with Rapid7 Real Risk™** that incorporates comprehensive data on Malware and Exploit Exposure, CVSS, and temporal and weighted risk scores.
- **Develop best practices for risk mitigation strategies** with advanced risk analytics that allow for customized risk scores and dynamic risk trending
- **Ensure compliance with policies, auditing guidelines and regulations** such as PCI, FDCC, USGCB, HIPAA, NERC and FISMA.
- **Eliminate risk faster** through streamlined step-by-step remediation reports and task delegation.
- **Integrate with third-party applications** and enterprise systems via Rapid7's flexible and extensible XML-based OpenAPI™.
- **Flexibly deploy a closed loop security risk intelligence solution** as software, appliance, mobile laptop, managed service or private cloud.

NEXPOSE ENTERPRISE EDITION

Rapid7 Nexpose® Enterprise is a security risk intelligence solution that proactively supports the entire vulnerability management lifecycle, including discovery, detection, verification, risk classification, impact analysis, reporting and mitigation. Designed for organizations with large networks and virtualized infrastructure deployments, which require the highest levels of scalability, performance, customizability and deployment flexibility, Nexpose Enterprise Edition helps organizations effectively improve their risk posture.

Take a holistic approach to vulnerability management

Nexpose drives the collection of security risk intelligence to give you the insight you need to make more effective security decision for your business.

- **Scan 100% of your IT infrastructure:** scan databases, web applications, network devices across both physical and virtual environments to ensure you know about all of your vulnerabilities
- **Accurately understand your real risk exposure:** with continuous discovery of physical and virtual assets along with integrated information on Malware and Exploit exposure, Nexpose provides insight into your most significant risks
- **Prioritize vulnerabilities quickly and accurately:** scans can uncover thousands of vulnerabilities; with Rapid7 Real Risk™, Nexpose effectively prioritizes your remediation efforts so you don't waste time
- **Verify that vulnerabilities have been remediated:** with integrated data from Metasploit, your security teams can verify that remediation efforts have been successful, reducing duplicate efforts and more effective risk reduction.

Gain Greater Insight with Real Risk™

“Understanding risk across virtual and physical environments can quickly become a daunting task if a complete view of assets and related exposures most vulnerable to an attack are not readily available. Companies have long needed a way to make smarter choices when managing their infrastructure and vendors like Rapid7 are helping to provide insight into actual and validated risks.”

ABOUT RAPID7

Rapid7 is the leading provider of security risk intelligence solutions. Rapid7's integrated vulnerability management and penetration testing products, Nexpose and Metasploit, empower organizations to obtain accurate, actionable and contextual intelligence into their threat and risk posture. Rapid7's solutions are being used by more than 2,000 enterprises and government agencies in more than 65 countries, while the Company's free products are downloaded more than one million times per year and enhanced further by over 125,000 security community users and contributors. Rapid7 has been recognized as one of the fastest growing security companies by Inc. Magazine and as a "Top Place to Work" by the Boston Globe. The Company is backed by Bain Capital Ventures and Technology Crossover Ventures. For more information about Rapid7, please visit <http://www.rapid7.com>.

DS 04/12

Proven in over 2,000 enterprise deployments, Nexpose Enterprise Edition delivers the following core capabilities:

Continuous discovery of virtualized assets – Native integration with VMware vCenter enables Nexpose to deliver accurate visibility of all virtual assets and immediate insight into the threat exposure of those assets.

Create and manage dynamic sites – administrators can group assets according to customized risk strategies and dynamically track the status of those assets as changes occur to their state (powered-on/off, changes virtual host, etc.)

Rapid7 Real Risk – Provides clear insight into the real risk of each unique environment by incorporating information on Exploit Exposure, Malware Exposure, temporal and weighted risk scores as well as CVSS rankings.

Unrivaled breadth of unified vulnerability scanning – Scans for over 28,000 vulnerabilities with more than 85,000 vulnerability checks in networks, operating systems, web applications and databases across a wide range of platforms.

Ongoing vulnerability updates – Automatically provides vulnerability updates without user intervention. Delivers immediate Microsoft Patch Tuesday vulnerability updates within 24 hours to stay current with the changing threat landscape.

Prioritized risk assessment – Identifies risk based upon how the vulnerability in one system affects another and customizes the risk scoring system to fit your unique organizational requirements.

Comprehensive compliance and policy checks – Determine if your systems comply with corporate or regulatory policies such as PCI, HIPAA, NERC or FISMA.

Strong security configuration assessment – Centrally manages your policies and easily detect misconfigurations in your environments. View policy dashboards and report compliance with regulations such as FDCC, USGCB and SCAP.

Robust predefined and customizable reports and dashboards – Leverage dozens of out-of-the box reports and view executive dashboards to obtain instant insight into your security posture. Create additional reports on the fly.

Prioritized remediation guidance – With greater insight from Real Risk reporting, resolve the most significant vulnerabilities quickly with detailed remediation reports.

End-to-end enterprise workflow support – Manages and helps automate the end-to-end vulnerability management lifecycle including intelligent discovery, risk detection, testing and validation, actionable reporting and remediation. Effectively manages exceptions and policy overrides with approvals and escalations.

Powerful administration management – Supports centralized administration for geographically or organizationally dispersed network environments provides role-based access for delegated administration and reporting and integrates with Active Directory and other repositories for role-based groupings.

Extensive enterprise integration – Integrate Nexpose Enterprise with many third-party security, compliance and risk management solutions based on pre-built integrations and Nexpose's XML-based OpenAPI™.

Out-of-the box Metasploit® integration – Works with Metasploit to provide remote scan control, exploit identification and automated exploitation functionality.

Flexible deployment models – Deploy as software, appliance, mobile laptop, managed service or private cloud to meet your unique security assessment needs.
